Forensic Psychological & Neuropsychological Evaluations

*The forensic psychological evaluation process begins with one phone call to **Iroquois Mental Health Center**. We will find the right evaluator to meet the client's needs in your area.*

Forensic evaluations available throughout the State of Illinois via:

- Zoom
- Google Meets
- In Person

Forensic psychology is the intersection between psychology and the justice system. Forensic psychological and neuropsychological evaluations involve criminal behavior, social issues, and knowledge of the law and principles of psychology in order to evaluate the dependents' understanding of the charges and whether they can participate in their own defense.

Iroquois Mental Health Center has a team of evaluators who are experienced licensed clinical psychologists with specialized forensic backgrounds. Services are performed by therapists, case managers and clinical psychologists.

- Forensic Evaluations
- Psychiatric Referrals
- Case Management
- Restoration to Fitness
- Therapy if Necessary
